

# **SUMMARY REPORT**

## **1. Cleaning data:**

- The data was partially clean except for a few null values and the option select had to be replaced with null value since it did not give us much information. Few of the null values were changed to 'not provided' to not lose much data. Although they were later removed while making dummies. Since there were many from India and few from outside, the elements were changed to 'India', 'Outside India' and 'not provided'.

## **2. EDA:**

- A quick EDA was done to check the condition of our data. It was found that a lot of elements in the categorical variables were irrelevant. The numeric values seem good, and no outliers were found.

## **3. Dummy Variables:**

- The dummy variables were created and later on the dummies with 'not provided' elements were removed. For numeric values we used the MinMaxScaler.

## **4. Train-Test split:**

- The split was done at 70% and 30% for train and test data respectively.

## **5. Model Building:**

- Firstly, RFE was done to attain the top 15 relevant variables. Later the rest of the variables were removed manually depending on the VIF values and p-value.

## **6. Model evaluation:**

- A confusion matrix was made. Later, the optimum cut off value was used to find accuracy, sensitivity and specificity which came to be around 80% each.

## **7. Prediction:**

- Prediction was done on the test data frame and with an optimum cut off as 0.35 with accuracy, sensitivity and specificity of 80%.

## **8. Precision-Recall:**

- This method was also used to recheck and a cut off of 0.41 was found with precision around 73.24% and recall around 76.61% on the test data frame.

**It was found out that the variables that mattered the most in the potential buyers are:**

- The Total Time Spent on Website.
- Total number of Visits.
- When the lead source was- a) Olark chat, b)Wellingak Website
- When the Last Activity was- a) SMS, b) Olark Chat Conversation
- When the lead origin is Lead add Form.
- When the current occupation was-) a) Working Professionals, b) Student, c) Unemployed, d) Other

Keeping the above mentioned points in mind the X education can increase all the potential buyers to change their mind and buy their courses.
